CAREER SUMMARY

I am fluent in French, English and Vietnamese

I've graduated from Computer Science Technologie at Vanier College

As a Front-End Web and Mobile Developer with HTML/CSS, Javascript, Slim Template and AngularJS as my go-to tools, I have a passion in coding and earn a creative knowledge by working with the team of web designers.

I have participated in teams at the 2015 Hackathon by Diro at the University of Montreal. http://hackathon.iro.umontreal.ca/, recreating the Classic 1 level Super Mario Bros Game.

I am currently learning Angular 2, Node.js, Typescript and Ionic for an upcoming project.

I am a autonomous and versatile worker.

Also, I possess a good sense of responsibility and ability to work under pressure; I learn quickly and always enjoy a challenge.

EXPERIENCE

Front-End Developer   December 2015 – To date

Aldo Group   Saint-Laurent. Qc.

Responsibilities
- In charge of Aldo Newsletter Development
- Maintain layout of the Aldo website for both desktop and mobile using HTML, CSS/Sass, Slim and Ruby. Currently learning ReactJS because of process changes. (In collaboration with Marketing and Web Designer)
- Creating Newsletters daily using an automated system through HTML/CSS, .slim template, middleman and more. (In collaboration with CRM and designers)
- Optimize Newsletters system into a Responsive Newsletter to accommodate all devices.
- Optimizing Planogram and Products database.
- Developing and Managing new systems and projects using AngularJS, html/css and Google App Script.
- Training new Interns.

Skill Used

Ruby/RubyGem, modèle Slim, Sass, HTML/CSS, Middleman, iTerm, le serveur FTP, Litmus Framework, Github, Gitkraken, ReactJS, Google script, Breeze, Google Doc, Google Drive et Google Spreadsheet.

Internship ALDO Group   August 2015 – December 2015

ALDO Group   Saint-Laurent, Qc

Responsibilities
- Coding Newsletter manually for Call-it Spring(One of the brand at Aldo Group) with html/css
- Optimizing Online Planogram and PSS

Accomplishments
- Created the **Automatic System** newsletter for Call-it Spring. The system generates the code for three different languages Canada English, French and United State. Also, it generates the tracking code, title, logos, shipping, promotion and other information that are added on the google spreadsheet by the marketer. The Images are design by the designer at Call-it Spring also generated accordingly by their language. All done through Ruby, RubyGem, Slim template, html/css, Middleman, iterm, FTP server, google analytics and Litmus framework.

- Created **Online Planogram** to consult and facilitate presentation for designer, marketer and merchandiser. The project contains different structures of the dynamic website pages. It pulls automatically the products, headers, supporting and call-to-action's button that are provided by the merchandiser from the PSS (spreadsheet that contains all products, style, color, retails prices and more from different countries). Designer can also input their ideas and design of the pages. All done through google spreadsheet and all built-in google functions.

Skills Used
Ruby, RubyGem, Slim template, html/css, Middleman, iterm, FTP server, Litmus framework, Google doc, Google drive and google spreadsheets.

Skill Used
HTML/CSS, Javascript, Wordpress, Plug-ins of Wordpress

VOLUNTEER EXPERIENCE

Participants Programmer at   DIRO from University of Montreal

Recreate one of the most iconic video game experiences: level 1-1 from the first Super Mario Bros. game. DIRO will be providing the team with a simple, compact, and easy to understand code base that'll allow the team to jump right into the action: the team will get to code the player, enemy, and level graphics, user input, physics, and animations (smashing blocks!). Teams will compete against the clock to add as many features as possible, with the ultimate goal of finishing a fully playable version of the first game level. Winners will be considered for a full 1-year scholarship in the DIRO's Computer Science

PROJECTS

Treetag Vanier College   June 2015

Vanier College   Saint-Laurent, Qc

Working as a Web Design and Front-End Developer Project Report.
It's a Vanier College project about environment trees. They create an app and website. While being in this team, I made reports for different type of trees and did some data integration in the MySQL database.

thaiviet.ca   February 2014
Restaurant Gourmet Thai Viet   Montreal, Qc

Working as a Front-end Developer and Designer.
A website for a Montreal-based vietnamese restaurant produced with WordPress and a couple of other plug- ins.

- Installed on a LAMP stack and optimized to have caching, search-engine optimization.
- Created Facebook, Yelp and Urban Spoon profiles for the restaurant to increase the ranking on the search engine.

EDUCATION

D.E.C. Computer Science Technology   August 2012 – December 2015
Vanier College   Saint-Laurent, Qc.
